🕐Profile

A detail-oriented Mechatronics Engineering undergraduate at the Federal University of Technology, Minna (FUTMINNA), with a passion for developing interactive applications and insightful dashboards. Adept in Python, data visualization, and software development, with hands-on experience in Tkinter, Flet, and analytical libraries like NumPy and Pandas. Eager to leverage technical skills to solve real-world problems in tech and data environments.

🎓Education

Federal University of Technology, Minna (FUTMINNA)

📘 Bachelor of Engineering (B.Eng.) in Mechatronics Engineering

📅 *Expected Graduation:* 2028

🛠Technical Skills

- **Languages:** Python, HTML/CSS, MATLAB
- **Libraries & Frameworks:** Flet, Tkinter, Pandas, NumPy, Matplotlib, IPyWidgets, Jupyter Notebook
- **Development Tools:** Git/GitHub, Visual Studio Code, Anaconda

---

📇 Projects

📘Quiz App (Flet)

- Built a quiz app using Flet with interactive question handling.
- Enabled real-time score tracking and visual feedback.
- Developed a clean user interface with functional feedback logic.

📊Sales Analysis Dashboard (Jupyter Notebook)

- Created synthetic sales data and implemented filters by region, product, and date.
- Utilized IPyWidgets to create an interactive experience.
- Built visual dashboards using Matplotlib and insights from dynamic datasets.

🕐 Certifications & Achievements

- 📜 Currently pursuing a Python Programming Certification via freeCodeCamp

---

🕐 Hobbies & Interests

- Coding innovative tools and applications
- Listening to music and exploring sound design
